## Profile:

I am a highly competent software engineer with over 5 years of developing, designing and testing applications for multiple platforms. I am specialized in objected-orientated programming, having more than 4 years' experience in Android development. I consider myself a very ambitious and reliable developer who is always eager to learn and use the latest technologies available in order to create the best user experience. During my past projects, I have learned how to always code at high-standards, from concept to completion.

## Employment History:

### Style Jukebox

*Senior Android developer*                                           *April 2015 – Present*

- Developed a new and improved Style Jukebox Android application from scratch
- Designed a complex, user-friendly and easy to use UI
- Understood and used "Big Data"
- Designed and implemented a reliable, scalable and fast SQLite database
- Was involved in developing new marketing and business strategies, especially regarding mobile applications

### Dailyroads Ltd.

*Junior Android developer*                                      *January 2012 – April 2015*

- Developed new features for the Dailyroads Android application ( > 1 million downloads)
- In charge of developing Android applications with highly complex features like image-processing or sending large files (>2GB) to a server
- Worked with other technologies like C or FFMPEG
- Used GIT and always communicated with the rest of the developers
- Learned how to properly estimate and manage time

### Buckle Consulting Ltd.

*PHP Laravel developer*                                       *November 2015 – April 2016*

- Worked on various websites for some of the biggest shipping companies
- Implemented new features like shipping management or payment
- Used GIT and successfully worked with other people in order to make the best product

## Education:

- **2015 – 2019 University of Southampton**
  Degree: Master of Engineering (MEng) Computer Science
  Modules studying this year: Programming I and II, Computer Systems, Algorithms,
  Foundations of Computer Science, Personal Development,
  Software Modelling and Design, Data Management

- **2011 – 2015 "C.D. Loga" National College Timisoara**
  Degree: Romanian Baccalaureate with 96.3% overall
  - 100% Informatics
  - 98% Mathematics
  - 91% Romanian Language and Literature

  ### Qualifications:
  - IELTS Certificate: 7.0
  - Romanian Informatics Certificate: 100%

## Skills:

## Technical Skills:

- Android development, PHP, Java, NodeJS, C/C++
- MySQL, SQL, SQLite
- HTML, CSS, Javascript

## Key Skills:

- Self-motivation
- Verbal communication
- Teamwork
- Time management, Planning and Organising
- Leadership

## Languages:

- Romanian - native
- English – advanced

## Others:

- Full current clean driving license

## Achievements:
